Financial literacy is the ability to understand and effectively apply various financial skills, regarding personal financial management, savings and loans, as well as investing.

Financial Literacy is the key

The essential elements of the FINLIT project

E+ FinLit aims to help **closing the gaps in the fields of financial literacy**.

Within the Intellectual output 3, we will interactively give special attention to 5 key topics:

- Introduction to financial literacy;
- Personal finance management;
- Creating savings;
- Loans and debts;
- Investments.

Why? If we borrow a saying from B. Franklin:

"An investment in knowledge pays the best interest".
